SUMMARY

I am an Information Systems student at UPN "Veteran" East Java with expertise in website development, interface design, and database management. Experienced in using technologies such as HTML, CSS, JavaScript, React, SQL, and Figma to create modern and responsive web solutions. I am able to work in a team and am ready to contribute to the development of user-oriented digital products.

WORK EXPERIENCE

MARKAS - SURABAYA   **November 2024 - January 2025**
Web Developer Intern
- Designing and developing a personality test website "MARKAS" based on the concept of The Startup Triangle Team (Hipster, Hustler, Hacker) with a responsive and user-friendly design.
- Implementing the Rapid Application Development (RAD) method to accelerate the system development process, while maintaining quality and flexibility according to user needs.Create a responsive and attractive user interface using HTML, CSS, JavaScript, and Tailwind CSS.
- Collaborate with the team using Figma and GitHub to ensure development efficiency and relevant personality test results based on user input.

INDEV (INCREASE Development)   **November 2024 - January 2025**
Web Developer Intern
- Design and develop an elegant, responsive, and informative INDEV website, with a focus on professionalism and ease of navigation.
